

Russell Dudek

Operator-technologist | Enterprise context | AI workflow
prototyping

Pittsburgh, Pennsylvania | 412.287.8640
russelldudek@gmail.com | linkedin.com/in/russelldudek
<https://russelldudek.github.io/TalentPluto/>

Role-aligned profile: Operator-technologist who turns ambiguous customer and operating needs into structured context, AI-enabled prototypes, explicit decisions, and reusable product learning. Combines enterprise customer credibility, direct operating execution, agentic workflow design, launch discipline, and cross-functional technical translation.

Enterprise onboarding Client discovery Roadmap translation Agentic prototypes Human authority Evaluation and governance
Operating cadence Technical handoffs

Relevant experience

Director of Operations

2025-Present

Vape-Jet

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

What transfers immediately

- Reads account context without losing execution detail.
- Turns repeated friction into explicit product decisions.
- Builds with modern AI tooling while preserving human authority.
- Creates evidence-based handoffs across business and engineering.

Founder / AI and Automation Advisor

2017-Present

DudeWorth

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.

Technical toolkit

Agentic AI | LLM workflows | RAG patterns
| Python | SQL | JavaScript | TensorFlow |
Tableau | ERP/Odoo | Jira | Confluence |
HubSpot | Slack | GIS

Operations Management / Site Leader

2014-2018

Amazon

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Served on the Amazon Prime Now launch team with Whole Foods and built leadership routines, labor planning, throughput visibility, escalation paths, and standard work.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement; contributed to Prime Air research and Amazon Flex geolocation concepts.

Credentials

Google AI Essentials
Food Safety Management Certification
IBM Enterprise Design Thinking
Practitioner
Six Sigma Certification
OSHA 10

Enterprise context

Maps outcome, data, workflow, stakeholders, constraints, and decision owner before work begins.

Prototype discipline

Defines the smallest credible test, human authority, evaluation, failure modes, and handoff.

Product learning

Turns repeated friction into an explicit configure, prototype, productize, or decline decision.

Complementary experience

Director of Operations and Engineering Management 2000-2013 [Compunetics](#)

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.
- Published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Regional Director 2021-2023 [Cardinal Building Products](#)

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

Chief Pilot, Autonomous Systems and Aerial Data Operations 2018-2022 [ZeusVu](#)

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Chairman of the Board 2014-2017 [Enviro Social Capital](#)

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

CMPT and EDS Pittsburgh Chapter Chair 2012-2016 [IEEE](#)

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.
- Organized conferences, seminars, business tours, and technical programming.

Education

University of Pittsburgh
Bachelor of Science
Academic grounding includes materials science, physical chemistry, and biology-related studies.

[Google Scholar profile](#)

Selected operating mechanisms

- Enterprise request briefs
- AI opportunity and readiness scoring
- Telemetry-to-work prioritization
- Quality and root-cause systems
- Launch and escalation cadence
- Standard work and training loops

Candidate thesis

Treat every enterprise request like a query plan - preserve intent and context, define the smallest proof, and make the product disposition explicit before work becomes roadmap commitment.

Technical communication:

Industry articles, technical talks, consortium participation, and regional programming connecting business, engineering, manufacturing, and emerging technology.
